## Satellite Receive Equipment – Information Sheet

### Receiver Options

**Humax F1-Ace FTA Satellite Receiver:**

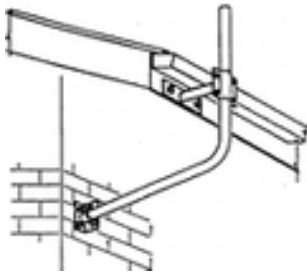

**Humax IR-5410z Irdeto Satellite Receiver:**

### Mount Options

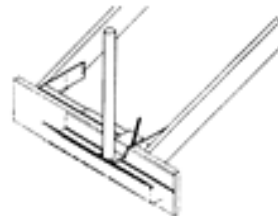

**Fascia Mount:**

Suitable for masonry or timber frame walls and may be used on both wood and sheet metal fascias. It is important that the rafter bracket supplied is used to reinforce the fascia. Avoids need for holes in the roof.

\*\*Finish – Hot dip galvanised.

**Gutter Mount:**

Simple, quick and easy. Installs underneath tiles, behind fascia board fixing into sides of rafters. Maximum of 600mm between rafters centres. No roof penetrations required  
\*\*Finish - Hot dip galvanised.

**Flexi-Mount:**

For sheet metal roofs. Depending on situation it may be installed with out entering roof space. It may be installed with the bracing running up, down or across the pitch of the roof. Braces are fully adjustable out to 1200mm.

\*\*Finish – Hot dip galvanised.

**Extended Wall Mount:**

Vertical Wall Mount. Suitable for North to North-East facing walls. Fixing to masonry walls below gutter line.  
\*\*Finish - Hot dip galvanised
